

This tutorial makes a 9" finished block (9 1/2" unfinished).

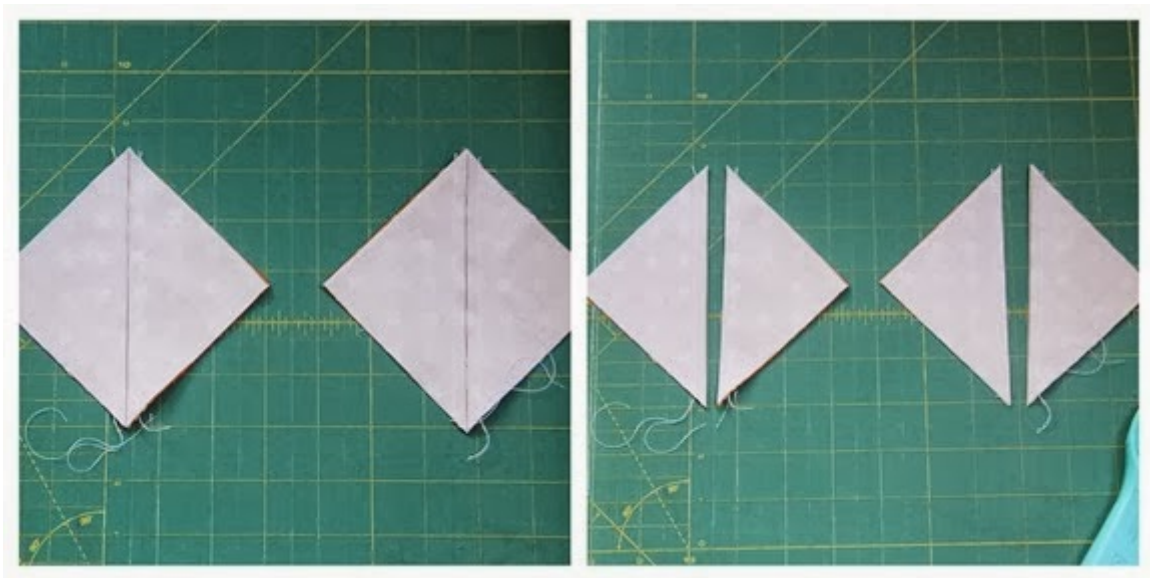

You'll need:

- 1 – 3 1/2" square (the blue fabric)
- 2 – 3 7/8" squares print fabric (orange fabric)
- 2 – 3 7/8" squares white fabric
- 1 – 2" x 15" strip of print fabric
- 1 – 2" x 15" strip of white fabric

1. Draw a diagonal pencil line from corner to corner on each white square. Place the white squares and print squares right sides together, sew a scant 1/4" on each side of the pencil line, cut down the pencil line, and press towards the print fabric. That was a mouthful...[here's a better look at making half square triangles](#) if your brand new to it.

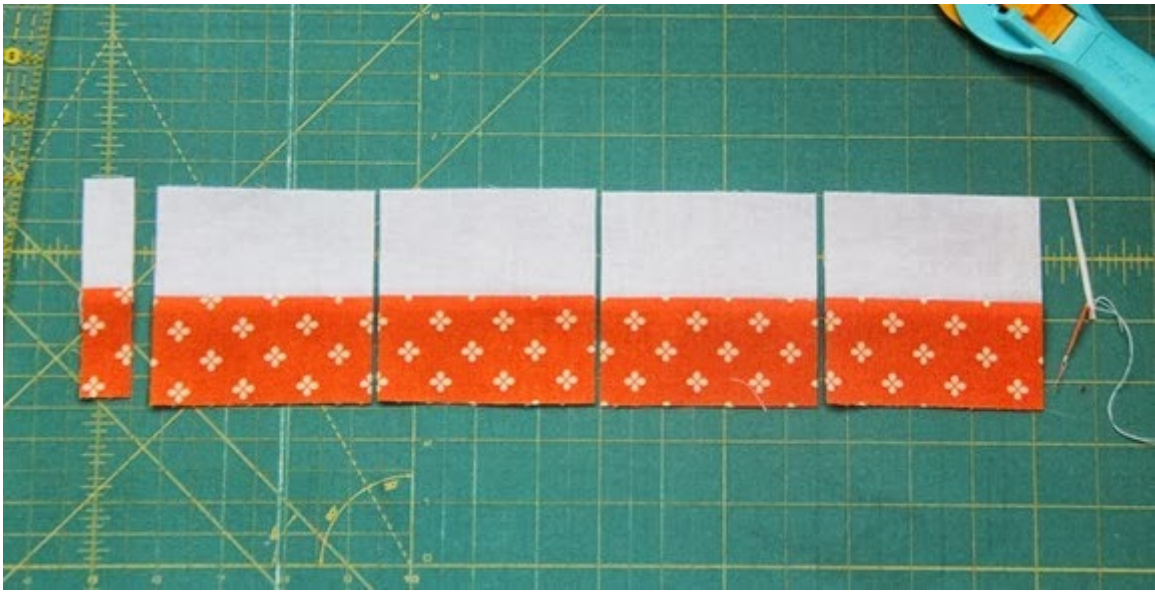

When your done you should have four half square triangles that measure 3 1/2" each.

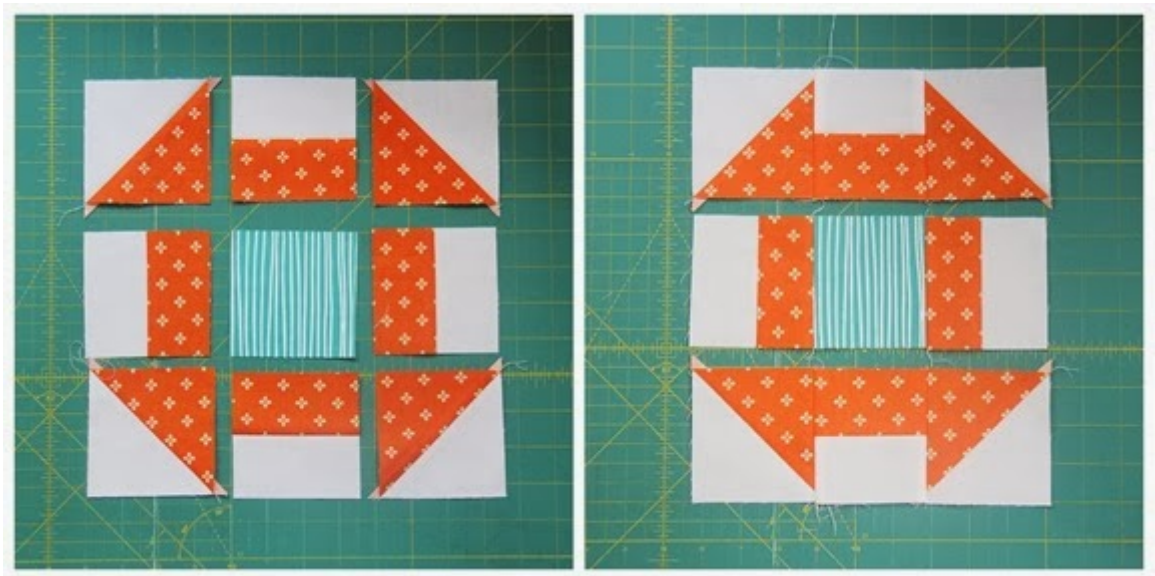

2. Sew the 2" strips together, press towards the print fabric. Here's a look at your pieces so far:

3. Cut the strip until into four squares 3 1/2" each.

4. Layout your pieces into the block. Sew the pieces into 3 rows. Press top and bottom row seams towards the center unit, and the center row seams towards the outer units.

5. Press the block well, it should measure 9 1/2".
